Void after 1 year from test and date. Cannabinoid content of batch material may vary depending on sampling error. Void after 1 year from test and date. Cannabinoid content of batch Limit of Quantitation (LOQ) are terms used to describe the smallest concentration that can be reliably measured by an analytical procedure. RPD=Reproducibility of two measurements. Action Levels are State determined thresholds for human safety for consumption and/or inhalation. The result = 99% are variable based on uncertainty of measurement (UM) for the analyze. The UM error is available from the lab upon request. The "Decision Rule" for the batch does not include the LM. The limits are based on: F.S. Rule 64-4-310.
